Dear Dr Rikard Ignell:

Your paper, submitted to the JOURNAL OF CHEMICAL ECOLOGY, has been accepted for publication, pending language and/or content editing by the Editor. Nevertheless, Figure 2 is still not satisfying: decanal in a. (compound 9) clearly elutes BEFORE 12.5 whereas in b. it clearly elutes LATER than 12.5. To clarify things, the following sentence will be added to the legend:

“Differences in retention times of decanal are due to slightly different GC-conditions.”

You should receive the galley proofs from our Manufacturing Department in New York approximately one month prior to publication. The paper will be published “OnlineFirst” on the JCE/Springer site after you proof it. It will remain there until it becomes part of an actual issue. The DOI number will remain with the paper.

Please notify all co-authors of the decision.

For queries regarding your accepted paper, please click the following link [http://www.springer.com/10886](http://www.springer.com/10886), then click on “Contacts”, and then “Production Editor”, complete the query form and click “Submit”.

Please remember to always include your manuscript number, #JOCE-D-15-00116R, whenever inquiring about your manuscript. Thank you.

Best regards,

Wittko Francke
Associate Editor
Journal of Chemical Ecology
