

Corrigendum to “Synthesis and anodic electrochemistry of cymanquine and related complexes” [J. Organomet. Chem. 817 (15 August 2016) 15–20]

Kevin Lam. William E. Geiger.

The authors regret that the oxidation potentials given for compound **5** in the paper are incorrect. The correct values, referenced to ferrocene, are 0.88 V for the first oxidation and 1.14 V for the second oxidation.
