This book provides research based insights into the lived experience of dementia, aging in place and the use of participatory and creative social research approaches in the field of dementia studies. For the first time the key findings of one of the UKs largest funded social science research projects, the Neighbourhoods study, are assembled into one accessibly written blueprint for dementia care aiding better understanding of the place and position of those living with dementia in the home and neighbourhood context.

Reconsidering Neighbourhoods and Living with Dementia highlights the importance of home for people living with dementia and that neighbourhoods are seen to be relational, virtual, technological, connected, lived, remembered, and imagined, and to exist within and across time. The book is organised under **five key parts**:

- **The Lived Neighbourhood**
- **Neighbourhoods, Measurement and Technology**
- **Neighbourhoods and Big Data**
- **Personal Well-Being and Neighbourhood Programme Support**
- **Bringing it Together and Future Directions**

Series Editors: Dr Keith Oliver and Professor Dawn Brooker MBE.

John Keady is a mental health nurse who has been involved in dementia care for over 30 years. Since 2006, he has held a joint appointment between the University of Manchester and the Greater Manchester Mental Health NHS Foundation Trust. He was the Chief Investigator of the Neighbourhoods study.

Introduction

Part I: The Lived Neighbourhood

Chapter 1: This is Our Story: Co-research and the meaning of neighbourhood for the Open Doors Research Group

Chapter 2: Overcoming Stigma in the Neighbourhood: Learning lessons from a co-operative inquiry led by people with dementia living in Salford, UK.

Chapter 3: How People Living with Dementia Experience and Contribute to the Social Life of Everyday Places

Chapter 4: Both and Neither Here nor There: The importance of physical and social thresholds in dementia
