April 2026 | 184 pages | SAGE Publications Ltd

This is your essential guide to carrying out research in schools. It walks you through each step offering smart practical guidance supported by real world examples of students' work to help you understand academic research vocabulary, avoid common pitfalls and produce a successful educational research project. It also discusses careful ground rules for the ethical use of AI tools in your research project.

- Learn how to frame an appropriate research question.
- Understand the careful ethical considerations involved in research in educational settings.
- Explore the pros and cons of different methods for collecting data.
- Find out how to analyse your data and write up your findings.
- Understand how researchers disseminate their work effectively to wider audiences.

This is vital reading for anyone training to teach in schools or studying on an education degree with a research project component.

Chapter 1 Introduction

Chapter 2 The nature of knowledge: what is it to know or learn something?

Chapter 3 Types of research in schools

Chapter 4 Ethics

Chapter 5 Choosing the focus and title of your research

Chapter 6 Research with children

Chapter 7 Research with adults

Chapter 8 Equality, Diversity and Inclusion. A chapter of related case studies

Chapter 9 The Literature Review

Chapter 10 Data Analysis

Chapter 11 Last steps: the conclusion, the introduction, the abstract, and the proofreading

Chapter 12 Dissemination
