SYNOPSIS

A revered auteur noted for his deliberate pacing and haunting, methodical style, Kiyoshi Kurosawa is the celebrated filmmaker behind a string of modern classics, including *Cure*, *Pulse*, *Tokyo Sonata* and *Creepy*. Collected here are two more great works by this master of psychological cinema: *Charisma* and *Cloud*.

Charisma follows Goro Yabuike (Koji Yakusho, *Cure*), an overworked police officer who leaves his job behind after he fails to resolve a hostage situation, resulting in the deaths of both a high-profile politician and his captor. Reeling from this incident, he seeks solitude in a mountain forest, where he finds himself at the centre of a conflict over an enigmatic tree that the locals have named “Charisma.” In *Cloud*, factory worker Ryosuke Yoshii (Masaki Suda, *Wilderness*) quits his job to pursue a new career as an unscrupulous online reseller, becoming increasingly ruthless as he turns a profit from desperate customers. Eventually, though, those customers have had enough of being ripped off by Yoshii – and go looking for him to exact their revenge.

Made 25 years apart, *Charisma* and *Cloud* illustrate the singular vision of one of Japan's most talented working filmmakers. Following previous releases of *Tokyo Sonata*, *Journey to the Shore*, *Cure* and *Creepy*, the Masters of Cinema series is proud to present two more of Kiyoshi Kurosawa's films on Blu-ray, both making their debuts on UK home video.
